

ZEBRA SEEDER

PREMIUM AIR SEEDER HOSE

Our air seeder hoses set the standard in value and performance. Made from a proprietary High Density Polyethylene (HDPE) blend, they combine a fast-flowing, abrasion resistant, low coefficient of friction interior with a UV-resistant and durable exterior. They are also very flexible, making installation a breeze. All our common sizes can hold full vacuum and up to 70 psi working pressure, so they'll fit almost any application. We offer both a standard white hose with a black helix as well as custom color options to fit any design situation.
